**The Amazing Tempur Pillow Range!**Do you like this topic? Tell us on Facebook! **What is Tempur?**

TEMPUR is a visco-elastic (memory foam) material that moulds to the exact contours of your body giving you total support where you need it. When you lift your head off TEMPUR, it returns to its original shape.

The TEMPUR material is temperature sensitive and visco-elastic and therefore responds to body temperature and body mass. The dual-lobe design, which was developed together with physiotherapists, supports the curve created by the head, neck and shoulders to properly align the spine. The structure of the pillow shifts to evenly distribute pressure and gently cradle the head, alleviating pain and creating a weightless sensation.

**Comfort**

The TEMPUR pillow offers a unique level of comfort. The anatomical design in combination with the pressure-relieving effect provides maximum comfort to the neck area, allowing neck and shoulder muscles to completely relax. The pillow comes in three sizes - Small, Medium and Large.

**The Evidence**

- **88%** of neck pain patients consider TEMPUR a major aid
- **78%** of neck pain patients would recommend TEMPUR pillows to people with joint pain
- Clinically proven to reduce tossing and turning
- **Used by hospitals and sleep centres** around the world due to the unique pressure relieving properties

**Reasons to Use Tempur**

1. Allows your spine and joints to rest in their **natural position**, resulting in less strain on supporting muscles, **less snoring** and **undisturbed sleep**.
2. The TEMPUR material cradles the head offering a superior combination of support and comfort.
3. **TEMPUR is the number one selling visco-elastic pillow in the world and the only pillow recognised by NASA.**
4. Consumer satisfaction research shows **95%** of TEMPUR users are wither satisfied or very satisfied with their pillow.
5. **3 year warranty**
